

TRANSITIONS

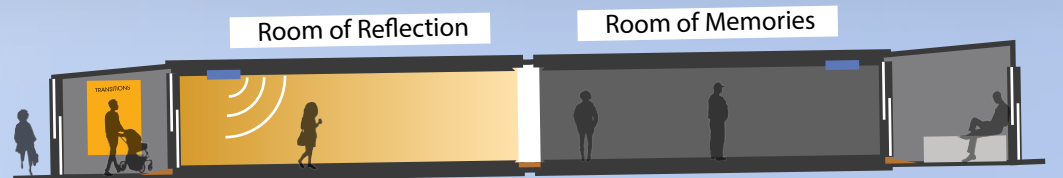

A Memorial Soundscape Exhibition

Designed by Milan Finnie

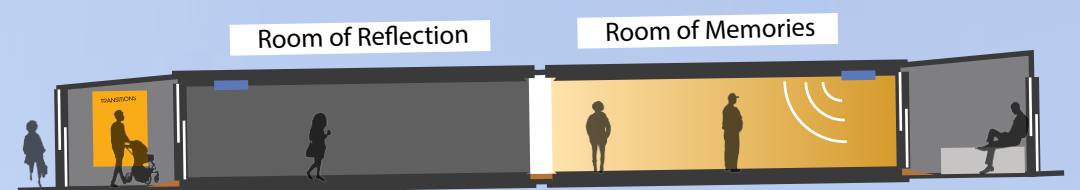

"Transitions" is a traveling soundscape exhibition that provides a memorial space for people to appreciate loved ones who have passed away. Two shipping containers will be used to create separate spaces; one containing the voices of those who lost someone, and the other containing the voices of those who have passed on.

An introductory space prepares visitors with instructions. A conclusion space provides a space to decompress.

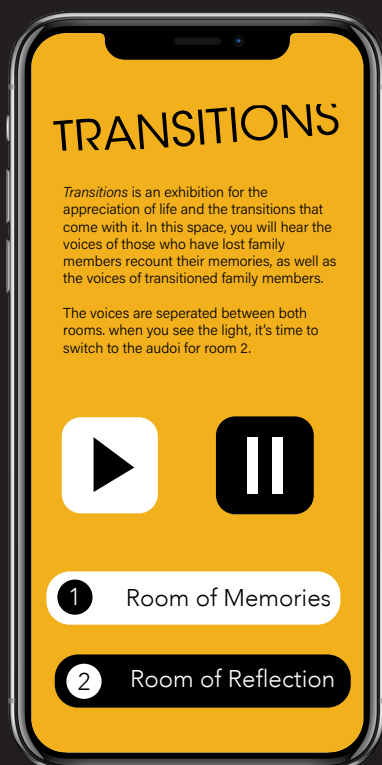

A small recording studio allows visitors to offer their own stories and audio of their transitioned loved ones.

Room of Reflection: Features voices of those who have lost loved ones. Stories, memories, messages to those they lost.

Room of Memories: Features voices of those who have passed on. Audio from videos, voicemails.

Visitors will bring headphones and use the application or weblink to listen to the exhibition audio. Limited smartphones and headphones will be provided.

Staff will be present to monitor and sanitize equipment utilized by the public.
